Objective

I am a dedicated Full Stack Developer with expertise in web and mobile application development, UX/UI design, WordPress, and workflow automation. I have practical experience building dynamic websites and applications using React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, PHP, and APIs, including seamless API integrations for efficient data management. Additionally, I have hands-on experience designing and implementing automated workflows using n8n, enabling businesses to streamline processes, integrate multiple platforms, automate content creation and publishing, and improve operational efficiency. I have successfully delivered multiple projects for companies in Gaza and Saudi Arabia, both remotely and on-site, showcasing my ability to solve real-world development and automation challenges. I am passionate about continuous learning, creating user-friendly digital experiences, and applying innovative solutions to complex business problems.

Gaza Training College (GTC)

Diploma in Software Development and Databases

I completed a diploma in Software Development and Databases at Gaza Training College (GTC), where I gained practical knowledge in web development, database design, and application development. The program provided hands-on experience in building web and mobile applications using modern development technologies and industry best practices.

University College of Applied Sciences (UCAS)
Bachelor's Degree in Artificial Intelligence Engineering (Current Student)

Currently a third-year Artificial Intelligence Engineering student at the University College of Applied Sciences (UCAS). Developing strong foundations in artificial intelligence, machine learning, data analysis, and intelligent systems, while continuing to expand my expertise in software engineering, web technologies, and automation solutions.

Work Experiences , Web Developer In Saudi Arabia

- Developed advanced web applications using Next.js and TypeScript, including an internal employee profile system for managing skills.
- Built an automated blogging system that generates, schedules, and publishes blog posts using workflow automation.
- Developed and integrated AI-powered chatbots to improve user interaction and automate customer support processes.
- Built and customized company websites using WordPress, tailored to company requirements and branding.

- Experienced in remote collaboration with companies in Saudi Arabia and Gaza.**Work Experiences, Web**
